Technical Data

Fuse Base LRT18NB

- This series fuse is suitable for AC 50Hz, raged voltage to 690V, rated current to 32A.
- It is mainly used for protecting the electrical circuit against overload and short-circuits(gG/gL).
- It also may derive for protecting the semiconductor device and others complete set installment from short-circuit(aR) as well as the electric motor from short-circuit(aM).

Electrical

Design according to : IEC 60269
 Rated voltage : 500V
 Rated current : 32A
 Working Frequency : AC 50Hz
 Breaking Capacity : 100kA
 Pole Number : 1P+N

Dimensions(mm)
