Technical Data

Fan Filter SF66 Series

- Function: it is cooperated with axial fan, industrial fan, radiating fan,
- Material: ventilation net made of fire retardant ABS resin, filtration screen made of foreign nylon fiber synthetic resin,
- Protection grade: IP44
- Characteristics: Anti-ultraviolet and static electric cabinet, vent constructed in 45 sloping angle, with merits of new style and good appearance, waterproof and etc., this is to ensure controller and precise electronic elements radiating effectively, extend the working life, lessen fault rate. Filtration screen need to be cleaned in period, to keep ventilation filtration result.
- Used to filter dust and impurities in the air for restaurant, factory, living building, and etc.
